Use Business Letter Tutorials from The Internet and what you have learned about letter writing in Communications & elsewhere to learn how to format the letter appropriately.

*Follow this guideline structure:*

Briefly identify yourself and why you are writing to the company. Expand your message in the next paragraph. Outline what you want from the company in another paragraph. Proceed quickly to end (inviting a response) with a short final paragraph. Use a suitable complimentary close.

Provide appropriate details including dates, return addresses etc. Put addresses *etc* on the LHS.
