

# Web Authoring – CSS

## N22953

### Assignment – 30%

#### Brief:

Create a look-and-feel demonstration page for a specified company. The **single** page will represent a design solution in terms of appearance as well as navigation that can later be applied to all of a website.

1. CSS should be used to format all elements.
2. CSS should be embedded.
3. A suitable graphic for the page should be developed.
4. An appropriate page layout should be chosen.
5. A navigation solution should be included/suggested (sections should be: hardware, software, consultancy, maintenance, contact). The links should be clickable but with an empty link (*ie href=""*)
6. Use “Lorem Ipsum...” to illustrate how text will look; use h1 and h2 headings as well as p text.
7. Ensure your page is linked to from the Web Authoring CSS page on the course website.
8. Ensure your page is validated (CSS & HTML) and provide evidence of this.

The company for whom you are creating a demonstration page is:

### Alpha Computer Services

...who market their products with the slogan:

*every bit better*

...and use predominately reds, blues and whites in their copy.

Develop a **single** page demonstration of the look and feel for a proposed website for the above named company.

Document all steps taken and list challenges faced.

#### Guidelines:

- Supporting documentation should be in one file.
- A printed copy of the demonstration page should be included.
- The source (HTML and CSS) should be included.
- The assignment should be standard formatted (see sheet on standard formatting) and use a standard Cover Sheet.
- Online submission will be made via **treebeard.ie**
- The assignment should be submitted using the submission box in Room 15; please ensure the assignment is stamped and dated first.
- Complete and submit by: **12:45, Friday 2<sup>nd</sup> May 2014.**
