

## NAME

ops - Perl pragma to restrict unsafe operations when compiling

## SYNOPSIS

```
perl -Mops=:default ...      # only allow reasonably safe operations
```

```
perl -M-ops=system ...      # disable the 'system' opcode
```

## DESCRIPTION

Since the `ops` pragma currently has an irreversible global effect, it is only of significant practical use with the `-M` option on the command line.

See the *Opcode* module for information about opcodes, optags, opmasks and important information about safety.
