Section B (20%)

*Answer any **two** questions. All questions carry equal marks (10 marks each). If you answer more than two questions the best two marks will be chosen.*

1. (a) List the main components required to create a computer network. Write a description of the most important ones, explaining the function of each.

5 marks.

(b) List the main components required to link a computer to The Internet.

5 marks.

2. (a) Write a note on communications resources in a PC. What difficulties can arise with the addition of new hardware to a PC?

2 marks

(b) When buying a new computer one must make choices about CPU speed, RAM amount and hard-drive capacity. Is it always best to buy the fastest CPU or is there a case to be made for spending the money this would cost on extra RAM or extra hard drive capacity? Discuss.

8 marks

3. Redhat Linux is an operating system developed under the Open Source model. Microsoft Windows is a proprietary operating system developed by a private company. From your experiences compare the two operating systems under any *five* of the following headings:

> Cost
>
> Reliability
>
> Range of available applications
>
> Ease of use/user friendliness
>
> Hardware compatibility
>
> Security

10 marks

Max mark	**Mark range:**
8 marks:	0-3 not good response;
	4-5 good but obviously lacking;
	6-7 good but imperfect;
	8 completely accurate & appropriate answering.
5 marks:	0-1; 2-3; 4; 5
2 marks;	0; 0.5; 1–1.5; 2
10 marks:	0-4; 5-6; 7-9; 10;
