NAME

Test::Harness::Util - Utility functions for Test::Harness::*

SYNOPSIS

Utility functions for Test::Harness::*

PUBLIC FUNCTIONS

The following are all available to be imported to your module. No symbols are exported by default.

all_in({parm => value, parm => value})

Finds all the *.t in a directory. Knows to skip .svn and CVS directories.

Valid parms are:

start

Starting point for the search. Defaults to ".".

recurse

Flag to say whether it should recurse. Default to true.

shuffle(@list)

Returns a shuffled copy of @list.

blibdir()

Finds all the blib directories. Stolen directly from blib.pm
